

South Coast Gas Company / Pierre Part Natural Gas Gas Generator Installation – Information Form

South Coast Gas Company and Pierre Part Natural Gas are dedicated to bringing safe and reliable service to all of its customers. Whole home generators are quickly becoming a necessity for today's electric and digital world. In order for us to continue to bring quality service to our customers, we need to make sure that we are informed on general information and installation of generators on our natural gas systems.

We are requiring that all individuals or companies installing whole home generators on the SCG or PPNG systems provide the following information to our gas superintendents **before** permit application. After review, an approved copy of this document must be provided to the permit office for application. This is to ensure the most efficient installation set up on the SCG & PPNG systems. Please be aware that different natural gas distribution companies operate at different pressures. Due to this, the installation of gas regulators may differ from place to place.

Once generator installation has been completed, a SCG or PPNG gas technician will be required to inspect the generator installation to close the permit process.

Please provide the following information for the installation of a natural gas generator.

Generator Brand Name: _____

Generator Make/Model: _____

Generator KVA: _____

Pressure Water Column Required: _____

Peak (100%) Load NG Fuel Consumption: _____

Type of Work: New Installation Generator Upgrade / Replacement

Size of Pipe: _____ Length of Pipe: _____

Please provide a sketch of the Site Plan for review.

This form can be acquired at the South Coast Gas Co. Office at 4076 Hwy 1, Raceland, La 70394 or on our website www.southcoastgasco.com. Please return this form to the SCG office or email to pchiasson@southcoastgasco.com.

Disclaimer : South Coast Gas and Pierre Part Natural Gas recommends that customers consider alternate or supplemental fuel alternatives in the case of a gas outage. Gas services cannot be guaranteed during times of emergency such as line ruptures, natural disasters, or civil disturbances.

To be signed by Gas Superintendent
